Always
Smiling,
Orthodontics!

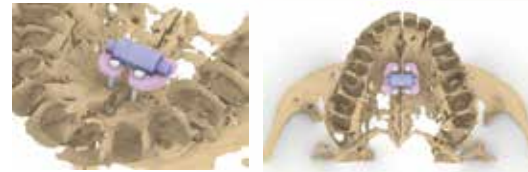

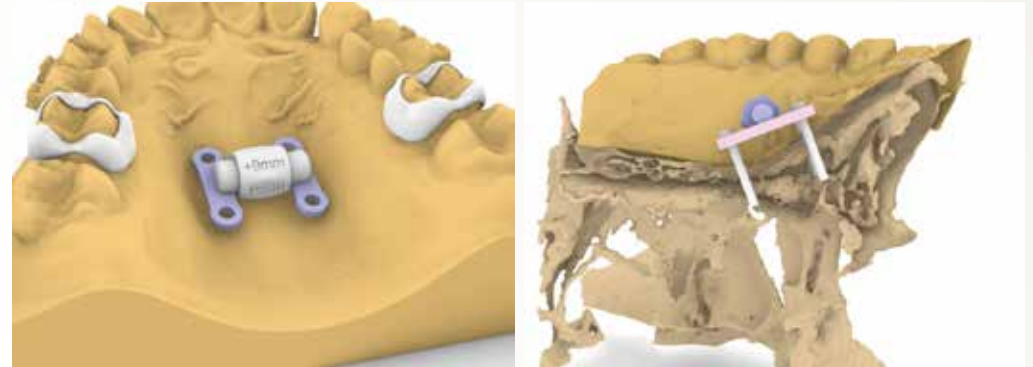

MARPE

Surgical Guide is set and positioned at the best position which is analyzed from CBCT data.
We're offering a reliable appliance based on our experience and achievements that we've handled a lot so far.

Metal Print HYRAX type MSE

Fusion between ASO's digital technology and metal 3D printing.
We use CT data to communicate effectively with doctors.

An orthodontic device with sliding mechanism that combines innovative digital technology together with metal 3D printing.

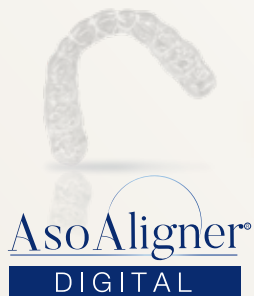

With Aligner

With Aligner

DirectPrint Aligner LuxClear

- High Printing Accuracy is realized by original high power 3D printer
- Eco-Friendly / No need a printed model
- LuxClear don't be deformed by Shaped Memory materials
- Uniformed Thickness and well-fitting.

Evolution
